### **What is Lorem Ipsum?**

**Lorem Ipsum** is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum

# **FUTURE study Section 1: What does a dermatologist do?**

A board-certified dermatologist has extensive training, which allows them to accurately diagnose and properly treat more than 3,000 diseases of the skin, hair, and nails as well as cosmetic concerns.

If you were to watch a dermatologist at work on any given day, you might see them:

- Treat a baby's prominent birthmark that threatens the child's eyesight.
- Remove a mother's deadly melanoma at its earliest, most treatable stage.
- Offer relief for a student whose chronic eczema makes sleep nearly impossible.
- Diagnose the life-threatening liver condition causing a grandfather's unbearable itching.
- Treat the hair loss of a young woman, helping her gain the confidence to search for a job.

Your dermatologist knows the difference between something small and something major.

Dermatologists also understand that a skin condition can have a serious impact on your health and well-being. Sometimes, a skin condition is a sign of a serious underlying health issue, and your dermatologist may be the first one to notice it. For example, signs of diabetes and heart disease can show up on the skin.

Your dermatologist knows that a skin condition doesn't have to be life-threatening to reduce a person's quality of life. A skin condition can cause sleep loss, poor self-image, serious depression, or lost productivity. Eczema (aka atopic dermatitis), hair loss that causes scarring, and psoriasis are some conditions that can do this.

## **What is a board-certified dermatologist?**

To become board certified in dermatology requires:

1. Going to medical school and becoming a doctor
2. Successfully completing residency training in dermatology
3. Passing the board exam, a challenging exam that tests the dermatologist on the knowledge and skills acquired during their years of training

Passing the board exam means the dermatologist is board certified. Board certification comes from one of these three organizations:

- American Board of Dermatology
- American Osteopathic Board of Dermatology

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for

'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).

## **The role of the nurse - Replay from the Novartis symposium on care pathways, SFR 2022**

As part of the SFR 2022 annual congress, Novartis organized a symposium on the care pathway. In this video, you'll find an excerpt from the symposium, entitled "What roles for nurses? Changes linked to the development of ambulatory care in medicine."

Indeed, the transition to ambulatory care models and the changing roles of nurses in the hospital are two hot topics that are part of the future of rheumatology. The implications are numerous, touching on human resources management, professional training and the quality of multidisciplinary care for patients.

Presented by Professor Bruno Fautrel (rheumatologist, AP-HP GH Pitié-Salpêtrière) and Doctor Emmanuelle Dernis (rheumatologist, GH Le Mans), this symposium offers an analysis of the changes linked to the development of ambulatory care in medicine, as well as information on the varied and essential roles of nurses, with experience shared in

rheumatology departments.
