UnoReady® 300 mg injection video

Cosentyx® (secukinumab) is indicated for the treatment of moderate to severe plaque psoriasis (PsO) in adults, children and adolescents from the age of 6 years who are candidates for systemic therapy; active psoriatic arthritis (PsA) in adult patients (alone or in combination with methotrexate [MTX]) when the response to previous disease-modifying anti-rheumatic drug therapy has been inadequate; active moderate to severe hidradenitis suppurativa (HS; acne inversa) in adults with an inadequate response to conventional systemic HS therapy.¹

[Full indications for Cosentyx can be found here.](#)

[Cosentyx Summary of Product Characteristics \(SmPC\) can be found here.](#)

Cosentyx is intended for use under the guidance and supervision of a physician experienced in the diagnosis and treatment of conditions for which Cosentyx is indicated.

This page contains a 5-minute video demonstrating how to prepare and deliver Cosentyx with the UnoReady® pen.

Image

For a 300 mg dose, one 300 mg pen or two 150 mg pens are needed.

For information on the Cosentyx SensoReady® 150 mg pen click [here](#).

For UK Healthcare Professionals only.
